

▶ Sliding door handles

Sleek design for modern doors

High-quality stainless steel with a premium look

Sliding doors are widely used in wardrobes and storage cabinets and are increasingly popular as interior barndoors as well. Thanks to their space-saving design where the door slides along the wall rather than swinging open, they are ideal for narrow hallways, bedrooms and smaller spaces. These high-quality sliding door handles give wooden sliding doors, both for furniture and interior applications, a modern, clean and premium appearance. The flush, recessed installation also ensures comfortable and smooth operation.

Benefits

- ▶ **Stylish fit:** The recessed mounting ensures the handle does not protrude, creating a clean and seamless look.
- ▶ **Suitable for modern and classic interiors:** The clean, minimalist design complements both contemporary and classic interior styles.
- ▶ **Multiple design options:** Available in three sizes and two finishes.
- ▶ **Premium quality:** Made from high-quality AISI 304 stainless steel.
- ▶ **One Stop Shopping:** Matching sliding door components such as rollers, door handles and concealed magnets are also available
- ▶ **Universal:** Suitable for sliding wardrobe doors and interior sliding doors.
